

<b>PAGES</b>	<b>PAPERS</b>
1 - 9	<b>Modeling and Analysis of Relationship Between Flow Characteristics and Efficiency of Reciprocating Porous Medium Burner</b> <i>Boxue Zhong, Weihua Li</i>
11 - 18	<b>Automatic Obstacle Avoidance Path Planning Method for Unmanned Ground Vehicle Based on Improved Bee Colony Algorithm</b> <i>Yan Ren, Jiayong Liu</i>
19– 29	<b>Interference Suppression Control Method for Aircraft Electromechanical Speed Control System</b> <i>Qian Zhang</i>
31– 40	<b>Gait Control System of Autonomous Mobile Robot Based on PMAC</b> <i>Guobin Si, Xiaofeng Jin, Chunxia Wang</i>
41– 51	<b>Optimal Control Method for Side Impact Safety of Vehicle Frame Structure</b> <i>Mingming Wu, Xueping Zhang</i>
53– 62	<b>Dynamic Response Analysis of the Impact Force of Steel Wheel on the Elastic Half-Space</b> <i>Zhipo Cao, Naixing Liang, Sheng Zeng, Xianshui Gang</i>
63– 72	<b>Application of Direction Vector Model of Multibody System Dynamics in Sports Posture Positioning</b> <i>Feng Liu</i>
73– 78	<b>Theoretical Research of Corn Orientation Device</b> <i>Liai Pan, Yanli Wu</i>
79–86	<b>Parallel Computing-Based Dynamics Model for Tracking Moving Targets</b> <i>Yugang Cui</i>
87–95	<b>Coordinated Gait Control of Snake Like Robot Based on Electromechanical Tracking</b> <i>Jianwei Guo, Yongbo Lv, Han Zhang</i>
97–104	<b>Trajectory Tracking Control Algorithm of Six Degrees of Freedom Industrial Robot</b> <i>Zhenhua Meng</i>
105–111	<b>Design of Multi Joint Integrated Control System for Non Driven Robot</b> <i>Qian Zhang</i>

**PAGES****PAPERS**

---

- |         |   |
|---------|---|
| 113–121 | <b>Temperature Field and Stress Field Distribution of Forged Steel Brake Disc for High Speed Train</b><br><i>Ruoqi Suo, Xiaoling Shi</i>                                      |
| 123–131 | <b>Mechanical Parts Pose Detection System Based on ORB Key Frame Matching Algorithm</b><br><i>Chun Liang</i>  |
| 133–139 | <b>Design of Visual Monitoring Software for Micro-Drive Debugging in Electromechanical System</b><br><i>Qian Wang, Yuqing Zhao, Hongjun Shi</i>                               |
| 141–152 | <b>Design of Quantitative Risk Assessment System for Ship Longitudinal Motion Based on Analytic Hierarchy Process</b><br><i>Lixiao Jia, Jiantao Wang, Lejun Rui, Jing Chu</i> |
| 153–162 | <b>Multi-Layer and Multi-Channel Welding Trajectory Control Method of Welding Robot</b><br><i>Baiyang Zhao</i>  |
