

PAGES**PAPERS**

1 - 6

Techno-Economic Analysis of a Concentrated Solar Polygeneration Plant in Jordan*S. Kiwan, L. Venezia, F. M. Montagnino, F. Paredes, R. Damseh*

7 - 15

Numerical Modeling of Hydrogen Embrittlement of a Hollow Cylinder*Assia A. Lakhdari, Ilya I. Ovchinnikov, Aissa Seddak, Igor G. Ovchinnikov*

17– 22

Optimization of Welding Parameters by Using Taguchi Method and Study of Fracture Mode Characterization of SS304H Welded by GMA Welding*Saadat Ali Rizvi , S.P Tewari*

23– 31

Finite Element Simulation and Prediction of Mechanical and Electrochemical Behavior on Crevice Corrosion in Sheet Pile Steel*Benamar Balegh , Habib Trouzine , Youcef Houmadi*

33– 43

Optimization Analyses of Parabolic Trough (CSP) Plants for the Desert Regions of the Middle East and North Africa (MENA)*Khaled M. Bataineh, Ahmad Gharaibeh*

45– 50

Effect of Water Column Height on the Aeration Efficiency Using Pulsating Air Flow*Ahmed A. Alkhafaji, Ammar A. T. Alkhalidi, Ryoichi S. Amano*

51– 58

Validation of Jordanian Green Building Based on LEED Standard for Energy Efficiency Methodology*Abdullah A. Alshorman, Khalideh Al bkoor Alrawashdeh, Malek Alshorman, Nesrin T. Talat*

59– 67

A Comprehensive Model of Reliability, Availability, and Maintainability (RAM) for Industrial Systems Evaluations*Mohamed F. Aly, Islam H. Afefy, Ragab K. Abdel-Magied, Eman K. Abd Elhalim*
