|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 687 - 707 | <b>A Lean Six Sigma Approach to Reducing Waste in Flour and Pasta Production</b><br>Samer Abaddi<br><a href="https://doi.org/10.59038/jjmie/190401">https://doi.org/10.59038/jjmie/190401</a>                                                                                                                                                                       |
| 709 - 719 | <b>Managing Energy Consumption and COVID-19 Infection Risk in Buildings Using Optimal Occupant Distribution</b><br>Yahia M. Al-Smadi, Razan Bader, Shaaban A. Slaman, Farhan Malik<br><a href="https://doi.org/10.59038/jjmie/190402">https://doi.org/10.59038/jjmie/190402</a>                                                                                     |
| 721 - 731 | <b>Effect of Natural Demulsifier on the Efficiency of Ultrasonic Assisted Oil Emulsion Separation</b><br>Hind A. Sami, Raheek I. Ibrahim, Manal K. Odah<br><a href="https://doi.org/10.59038/jjmie/190403">https://doi.org/10.59038/jjmie/190403</a>                                                                                                                |
| 733 - 747 | <b>Polynomial Regression Machine Learning for Burst Pressure Prediction and Gouge Assessment in API 5L X65 Pipelines</b><br>Yassine El Kiri, Zakaria Mighouar, Laidi Zahiri, Khalifa Mansouri<br><a href="https://doi.org/10.59038/jjmie/190404">https://doi.org/10.59038/jjmie/190404</a>                                                                          |
| 749 - 761 | <b>Impact and Flexural Response of Hybrid Composite Consisting of Waste Flex Banner and Glass Fiber</b><br>Rahmat Doni Widodo, Muhammad Irfan Nuryanta, Muhammad Hilman Gumelar Syafei, Shohihatur Rohman, Ahmad Mujaki, Febri Budi Darsono, Muhammad Akhsin Muflikhun<br><a href="https://doi.org/10.59038/jjmie/190405">https://doi.org/10.59038/jjmie/190405</a> |
| 763 - 774 | <b>Developing a Hybrid DPSO+LS+SA Method for Smart Single-Machine Scheduling with Sequence-Dependent Setup Times and Learning Effects</b><br>Mohammed Said Obeidat, Nader A. Al Theeb, Mohammad M. Hamasha, Asma'a Omar Qubaiah, Abdullah Obeidat, Hala AlSliti<br><a href="https://doi.org/10.59038/jjmie/190406">https://doi.org/10.59038/jjmie/190406</a>        |
| 775 - 784 | <b>Halal Supply Chain Traceability and Food Safety Model Based on Blockchain Technology and the Internet of Things Using a System Dynamics Approach</b><br>Miftakhurrizal Kurniawan, Suparno Suparno, Iwan Vanany<br><a href="https://doi.org/10.59038/jjmie/190407">https://doi.org/10.59038/jjmie/190407</a>                                                      |
| 785 - 794 | <b>Improving the Stepped Distiller Performance in Combination with Vertical Corrugated Wick Solar Still and Finned Absorber</b><br>A. Aldabesh<br><a href="https://doi.org/10.59038/jjmie/190408">https://doi.org/10.59038/jjmie/190408</a>                                                                                                                         |
| 795 - 805 | <b>Investigation of Mechanical Behavior in Plasma Nitrided Nickel-Boron-CNT Composite Coatings Using Response Surface Methodology</b><br>Alaa Mohammed Hussein Wais, Ahlam Hamid Jasim<br><a href="https://doi.org/10.59038/jjmie/190409">https://doi.org/10.59038/jjmie/190409</a>                                                                                 |
| 807 - 818 | <b>Utilization of Olive Mill and Medical Waste Ash in Cementitious and Concrete Mixtures Reinforced with Natural and Synthetic Fibers</b><br>Mohammed Jaradat, Razan H. Al Marahla, Mohammad Alaraj, Ahmad Manasrah<br><a href="https://doi.org/10.59038/jjmie/190410">https://doi.org/10.59038/jjmie/190410</a>                                                    |
| 819 - 828 | <b>A Comparative Electromyographic Analysis of Muscle Fatigue in Traditional Handwriting, Typing, and the Palmer Method: Implications for Ergonomic Writing Practices</b><br>Shahed Obeidat, Osama T. Al Meanazel<br><a href="https://doi.org/10.59038/jjmie/190411">https://doi.org/10.59038/jjmie/190411</a>                                                      |
| 829 - 838 | <b>Numerical Study on the Influence of Flow Hydrodynamics and Tube Geometry on Heat Exchanger Fouling</b><br>Abdullah A. Alshorman<br><a href="https://doi.org/10.59038/jjmie/190412">https://doi.org/10.59038/jjmie/190412</a>                                                                                                                                     |
